'I DISTRIBUTED MASKS & SANITIZER AMONG THE POOR'

We all are living in uncertain and challenging times due to the ongoing Covid-19 pandemic which has has taken so many lives and caused massive disruption to families and societies all over the world.

I can feel that pain as I lost a member of my family due to this deadly disease. I was very close to that member of my family.

People have lost their jobs and are dying because of scarcity of food. In these challenging times, our Covid warriors like doctors, policemen, housekeeping staff and army men are working very hard. I also decided to help the poor so that they can survive. I gave food and fruits to the needy people.

I gave food and water to the street animals also. With the help of my parents I even distributed masks and sanitizers among the poor people. I helped them as well as took all the precautions while stepping out of the house. Being indoors and taking all the precautions during this period is itself a very big help to the nation.

I felt really happy when I saw smiles on those people's faces., writes Aarushi Garg, Class 8, Delhi Public School, Sector 45, Gurugram

While helping the people, I felt really happy when I saw smiles on their faces. I even helped the old poor people and was really happy while receiving their blessings.

I did this when the lockdown wasn't there but as the lockdown has been enforced so I can't go out but I still keep biscuits for the dogs. I and my parents even made a donation to the PM CARES Fund. We helped our housekeeper who needed medicines but couldn't afford to buy them.

To be honest, I love helping the people as it gives me happiness from inside. I will be really glad if I can bring smiles on the faces of the people and help them in these difficult times. If we follow all the Covid protocols, I am sure we can fight against this virus. I am sure soon everything will be fine soon. We all should pray that things get better soon.
