

CLASS III – MINI PTM REPORT

‘Learning is more effective when it is an active rather than a passive process’

Kurt Lewin

The first Mini PTM for Class III was held on 25th and 26th April 2019. It was an endeavour to give an insight into the methodologies used in making learning fun. It not only gave an opportunity to the children to express themselves with confidence and poise but also to help them inculcate the values of teamwork and a sense of responsibility.

In Science, the concept of living and non-living things was beautifully demonstrated by the students through a skit and a poem. The importance of various concepts in Hindi Grammar was presented with the help of an interesting poem. In Mathematics, the concepts of place value and face value along with the importance of zero were made simple with a small enactment. A vivid PowerPoint presentation helped increase the visual impact and understanding of all the concepts covered.

Looking radiant in their colourful head gears the children were a treat to watch. As they spoke their lines with conviction, using beautifully made props, they left everybody mesmerized. The show was appreciated and applauded by one and all.
