

Primary Wing-Imagica-'Organic Way, Healthy Way'

A special science fair 'Imagica' was organized in the month of July in the Primary Wing of Delhi Public School, Gurgaon, Sector 45. The central theme this year was 'Organic Way, Healthy Way'. The children can preserve and protect nature only if they gain practical hands-on knowledge. They need to see how nature works firsthand. For theme-based demonstrations and explanations, various science corners were set up: 'Hydroponics' (growing plants without soil), 'Hanging gardens' (vertical gardening concept), 'Back to Nature' (use of clean energy), 'Food Pyramid' (healthy food choices), compost making, 'Biotic Community', 'Colourplay' (natural colours and dyes). Kechooram, the mascot, endeared one and all. The children also put up a green pledge leaf on the 'Tree of Life'. Imagica was truly engaging for the curious minds.
