

## Delhi Public School Gurgaon and I am Gurgaon, Join Initiative ...

### Where Does It Go?

*'Our Children have a fundamental right to a clear and healthy environment.' Waste is becoming a global threat.*

**Delhi Public School Gurgaon** joined hands with **I am Gurgaon** and became partners for a sustainable initiative. The school collected waste in three categories – Plastic, Metal and Ceramics /CDs . Three bins were installed in the school for students and teachers to have a greater understanding of segregation while also spreading the message of Reduce and Reuse .

On 28<sup>th</sup> February 2019, the Fine Art students of class 12<sup>th</sup> got an opportunity to work with eminent artist - Arun Kumar HG in making a public installation “The toxic chamber” using the segregated waste at the Wazirabad Bund, Sector -43.

Thus spreading the important social message to build greater awareness about sustainable life choices - **where does it go?**

Students Segregating waste for Art Installation

Working with Artists using city's plastic wastes
