

**“We don’t inherit the earth from our ancestors; we borrow it from our children.”**

**- David Brower**

Students of class VIII attended an enriching workshop on the topic ‘Climate Change’ on 12<sup>th</sup> April, 2019. The workshop was conducted by Matt Perry, a global citizen and environmentalist from the United Kingdom. The eco warriors of class VIII and IX attended the workshop and interacted with the resource person.

The workshop was a real eye opener for the students and made them realize the need to save mother Earth. It dealt about solving the issues of environmental destruction. Students were startled to learn that the past 5 years were the hottest years of the century. As a result the ice caps in the Arctic region are melting at a rapid speed. The resource person inspired the students to become true climate change warriors and join hands for a common cause – Save our Planet.

He also talked about Ms. Greta Thunberg, a climate change activist who created quite a stir asking world leaders to take a serious call on climate change. The objective of the event was to motivate the students to spread awareness about climate change. It was a motivational, inspiring and interactive session.
