

ECO-ADVENTURE REPORT

CLASSES– III, IV and V

“Travel is always about the experiences, not the destination.”

School trips are an amalgamation of travel, adventure and learning. They provide students with an opportunity to explore and experiment and bring out their inner qualities like leadership, team building and trust. Keeping the above in mind, an Eco Adventure Camp was organized for the students of classes III, IV and V on 26th, 11th and 22nd November 2019 respectively.

On reaching the camp site, trained instructors were assigned to lead the children through a series of thrilling and fun filled adventure activities such as Artificial River Crossing, Wall Climbing, Commando Net, Balance Beam, Commando Crawl and Tunnel Crawl Crossing which kept them engaged all through the day. The camel cart, tractor and bullock cart rides that took them around the vast open space of the camp was the icing on the cake. The children delightedly savoured the scrumptious meals with their peer group. The adventurous fun filled day ended with the children happily grooving to some lively music.

The lush green ambience of the farm was overwhelming where the students had a first-hand experience of the enchanting rural life. It was an enriching learning experience and the children carried home wonderful memories to be cherished forever.
