

‘How the World Works – The Standard Way!’ for Classes VII & VIII

Guest Speaker Program

On 19th July 2025, students of Class VII and VIII attended an insightful session conducted by Ms. Neha Yadav, Government Officer (Director, Bureau of Indian Standards, Ministry of Consumer Affairs). The session was aimed at introducing students to the importance of standards in everyday life under the theme ‘How the World Works – The Standard Way!’.

Through interactive discussions and real-life examples, Ms. Yadav explained how standards ensure safety, durability, quality, and functionality in a wide range of products—from pens and helmets to food items and electronics. Students were encouraged to think critically about product expectations and the silent role of standards in maintaining consistency and safety. The session not only enhanced students’ awareness of BIS and national standards but also connected their understanding to environmental sustainability through responsible consumption—key themes of the Green School Programme.
