

Math Day Report

**“Mathematics is not about numbers, equations, computations or algorithms;
it is about understanding.”**

In India, the National Mathematics Day is observed on 22nd December every year. It is celebrated to honour the birth anniversary of the famous Mathematician, Sir Srinivasa Ramanujan who made remarkable contributions in different aspects of Mathematics. To create awareness and to celebrate this day in our school, various activities were conducted on 20th November 2019.

Students of Classes III to V were involved in activities to consolidate the learning of Math concepts that encompass almost every sphere of life. Students of Class III and Class V learnt the concept of 3D shapes and tangrams respectively through a group activity while Class IV students enacted different professions highlighting the application of Mathematics in their field. Their creative skills and understanding of various concepts were enhanced in a fun way.

The Math Day left a lasting impression on the young minds to continue enjoy learning Math.
