

## REPORT ON DOLPHIN CONSERVATION AWARENESS ACTIVITIES

*‘Let the rivers sing with dolphins, not echo with silence.’*

The Junior Wing (classes III, IV and V) of DPS Sector 45, under the aegis of Eco Club for Mission LiFE actively participated in a series of awareness activities from 16<sup>th</sup> to 18<sup>th</sup> July 2025 which aligned with CBSE’s initiative to collaborate with the Government of India’s ‘Project Dolphin’. The project promotes marine conservation awareness among young learners by highlighting dolphins' role in maintaining biodiversity, emphasizing their ecological importance in rivers and oceans. Through engaging activities, students explored the significance of dolphins and developed a sense of responsibility towards protecting marine ecosystems.

Inspiring videos on dolphins were shown, followed by the students’ pledge to protect dolphins and spread awareness about their conservation. This collective commitment was a powerful moment of unity and purpose.

Adding a creative and emotional dimension to the campaign, students of Class V presented a thought-provoking street play titled ‘*Dolu ki Pukar*’ for their peers in the school hours. The performance depicted the struggles faced by dolphins due to pollution, habitat destruction, and human negligence. The street play left a lasting impression on the audience, reinforcing the message of environmental stewardship.

The Vice Principal (Sector-45), Ms. Arpna Gupta, Offg. Dean Community Outreach, Ms. Sarita Singh and Headmistress Junior Wing, Ms. Kanu Chopra applauded the students for their engaging performance and urged them to do their bit as next generation students who have a crucial role in preserving the planet’s environment.
