

Report - Workshop by Pro India Recycling

Each one of us can make a difference; together we can make a change.

As a constructive step towards betterment of living conditions for the future generation, our Prime Minister Shri Narendra Modi in his Independence Day speech had called upon the schools to actively participate in spreading the message of plastic waste management. Resonating the same thought, Delhi Public School, Gurgaon has collaborated with Pro India Recycling for a 6-8 months long initiative to involve the young and energetic Junior school students to generate the awareness against single use plastic.

As a part of the campaign, an awareness session was conducted by the Pro India Recycling team for the students of classes IV and V on Saturday, 14th September, 2019. The students were shown a presentation empowering them to bring about a behavioural change in society by adopting the eco-friendly approach of the 5 R's – Respect, Refuse, Reduce, Reuse, Recycle and become 'Earth Savers'.

The students participated with great interest and zeal in the interactive session and promised to take part in the Earth Savers' campaign.
