

MATHEMAGIC 2020

Mathematics is not about numbers, equations, computations or algorithms: it is about understanding.
–William Thurston

To develop a creative outlook and inclination towards Mathematics, Pi Squad, the Mathematics Club of Delhi Public School, Gurgaon organized an online event, Mathemagic 2020 wherein a variety of competitions were organized for classes VI, VII, VIII, IX and XI from 13th July to 17th July 2020. Through these activities, students were given a platform to showcase their logical thinking skills and creativity.

Class VI students took part in 'Math My Day' competition. They represented the time spent by them on various activities like reading, watching television, playing games etc. with the help of a pictograph. Through this activity, they learned to manage their time efficiently.

Class VII students made podcasts on 'Heroes of Mathematics' which gave them a chance to know more about contributions of Mathematicians. Students were inspired by several Indian mathematicians and took pride in sharing information about their work and inventions.

'Math Melody' was organized for class VIII wherein they presented their creativity through recorded videos of self-composed songs/rap songs. Talented composers performed with great confidence and shared their amusing songs.

Class IX students showcased the fun and lighter side of the subject by participating in 'Math-o-Mic' competition. They designed comic strips to reinforce a key Math skill involved in a mathematical concept.

'I-Math-ination' competition was organized for class XI in which students made presentations on innovative ways of tackling real life problems. Students used their creativity and imagination to solve problems faced in varied fields using Math.

It was an exciting and enriching experience for the students who participated wholeheartedly.
