REPORT
Webinar on Vedic Math

DATE: 29.09.20

ATTENDEES: Grade VI-VIII students and Math Teachers (MIDDLE SCHOOL)

RESOURCE PERSON: MS. VIDHI MANGLA

Vedic Mathematics is the ancient system of calculation which was drawn from the Vedas, between 1911 and 1918 in India. The advantage of Vedic Mathematics is that it allows for uncomplicated problem-solving methods for difficult arithmetic problems and large sums. In order to equip the students with the nuanced techniques of **VEDIC MATH,** a workshop was organized by **DPS, GURGAON** for students of classes VI-VIII on Tuesday, September 29, 2020 & was conducted by Ms. Vidhi Mangla from PRATHAM.

 The workshop sought to apprise students of tricks that they could employ to make their calculations faster and accurate—whether it be finding the cube roots of big numbers, multiplication of a number with a number of Nines or for two-digit multiplication. The moderator gave various examples and in hand practice to the students to grasp the tricks spontaneously. The students thoroughly enjoyed the techniques of fast calculations through a series of fun activities. Students showed keen interest and participated in the workshop with zeal and enthusiasm.
